

About Pristine™

Microdermabrasion has long become a brand name in aesthetic treatments and is the world's second most selling aesthetic procedure. It's no wonder that leading dermatologists and aestheticians of superstars incorporate this unique exfoliation treatment into every skin care regimen.

The award-winning Pristine™ microdermabrasion procedure offers patients a non-invasive and full scope exfoliation treatment that is comfortable and above all, a rewarding aesthetic experience. Since microdermabrasion is based on mechanical exfoliation, the results are immediately visible after the first treatment, making way for smooth, softer skin and a refreshed complexion.

Pristine™ - The Clear Cut Advantage

If you haven't made the switch, now is the time. The advantages are all in favor of upgrading your service offering as well as your patients' aesthetic experience.

- Hypoallergenic & hygienic diamond tips – easily cleaned for reuse.
- Free of crystal pollutants that harm the environment and irritate the skin.
- World's widest treatment tip variety - allows you to expand treatment offerings.
- Suitable for superficial to deep treatments for the face & body.
- Revenue driving system with cost effective applications for your practice.
- Suitable for sensitive skin.
- Fast, efficient treatments – minimal maintenance and ongoing care.
- Adjustable suction feature for full customization of treatments.
- Unsurpassed system performance – industry-leading motor power with silent operation.

Diamond Peel
Microdermabrasion.
Like No Other.

A Bare Necessity for Every Business

The Pristine™ diamond peel system is an ideal business investment for practitioners seeking to expand service offerings and increase revenues while minimizing ongoing expenses and eliminating maintenance costs. The Pristine system™ is suitable for medical use by physicians as well as for aestheticians in spas and salons.

Applications

The skin is the largest organ of the human body and is the first to be exposed to the numerous external environmental factors, every day. Prolonged exposure to sun, stress and pollution take a toll on the skin's condition and appearance. To strengthen and protect the skin, Pristine™ offers a unique long-term treatment method to reduce the appearance of sun spots, age spots, fine lines and wrinkles, acne scarring and skin pigmentation.

Unlike any other, the Pristine™ Diamond Tips™ are made of genuine, laser-cut diamonds for a high-quality microdermabrasion treatment that exfoliates the skin and whisks away dead cells from the skin surface.

Each Diamond Tip™ was designed with a specific coarseness grade and tip size to allow a wide range of treatment options, allowing you to reach the crevices around the nose and hairline to exfoliating larger body surfaces such as the decollete and buttocks.

Target Treatments

- Aging skin including eye areas, hands and large body areas
- Acne and trauma scars
- Congested & oily skin
- Blackheads and whiteheads
- Ingrown hairs
- Hyper pigmentation
- Sun-damaged skin

Minimizes Appearance of

- Fine lines and wrinkles
- Crow's feet
- Cellulite and stretch marks
- Age spots
- Uneven skin texture and glow
- Enlarged pores
- Blemishes

Pristine™ is also suitable for:

- Removal of dead and flaking skin cells while simultaneously stimulating production of healthy cells, collagen and elastin.
- Significantly assisting penetration of therapeutic and cosmetic solutions for enhanced treatment efficacy and results.
- Effective treatment of hard-to-reach, large and sensitive skin areas.

Technology

The Precision Diamond Peel

The Pristine™ DiamondTip™ kit introduces an aesthetic experience™ not found in conventional, crystal-based treatments. The Pristine™ microdermabrasion system is based on two sole functions: exfoliation and vacuum. Incorporating genuine, laser-cut diamonds into its treatment heads, Pristine™ is powered by the most reliable motor on the market to create the optimal microdermabrasion treatment.

Industry-leading experience and expertise are applied in the production of quality diamond tips which gently exfoliate the skin without cutting or scratching. The use of genuine diamond tips ensures 100% treatment accuracy time and again.

Testimonials

Practitioners

“The Pristine™ diamond tip has been a great asset to my day spa. It gives me consistently great results and is very easy to use.” - Siena, Aesthetician

“A journalist from a leading magazine came in for a Pristine treatment and she loved it so much she scheduled for another Viora treatment the next day. My staff love working with the Pristine and rave about it all the time. Having such a great product that my team and I believe in is very important to me.” - Joanne, Spa Director

“I started using Pristine™ because many of my clients have sensitive skin which irritates easily. Pristine™ diamond tips are hypoallergenic which has allowed me to continue treatments on these clients without irritating even the most sensitive skin.” - Clara, Dermatologist

“I have been working with the Pristine™ Diamond peel Microdermabrasion for over two years now and it has turned out to be a great asset to my business. As someone who worked with crystal-based systems, I used to be an avid fan. As skeptical as I was, I was extremely pleased to find out the wonderful world of Pristine™ Diamond peel treatments. I am greatly satisfied with the results which compare to any crystal device I ever used, minus the hassle. Today, I am able to offer a broad selection of treatments which were unavailable when I used the crystal device.” - Or-ly, Head Trainer & Licensed Aesthtician

“The Pristine™ Diamond Tip Microdermabrasion has been a great addition to our medical aesthetic practice. It provides me with consistently great results and is cost effective to maintain”. - Dr. Harris S. Hausen, M.D. Director, Medical Aesthetics

“I have been using the Pristine™ since it came out . We can clearly see a noticeable improvement after replacing an earlier crystal free model with the Pristine™. The quality of the diamond tips are so much better and it makes a huge difference in treatment results. We use it in conjunction with our facial treatments and we even use it before our photo-facials. Having so much variety with tips allows us to do a light exfoliation before a photo facial treatment which helps the light to penetrate even better, and the visible results keep our clients booking appointments.” - Stephanie, 40

Patients

“I always look forward to the Pristine treatment and I like the fact that my aesthetician is committed to giving me the best she can offer. I highly value her professional opinion and I know I’m getting a first class treatment” - Beth, 27

“I just love how my skin looks and feels after a Pristine™ treatment – glowing and refreshed. I feel so confident with my skin and I don’t even have to apply make up for two days afterwards.” - Virginia, 33

“I can’t imagine my bi-monthly skin treatments without the Pristine™. Looking back, I don’t know how I ever had a proper facial without it. I’m also undergoing IPL treatments for the pigmentation on my hands and my aesthetician incorporates the two. The Pristine™ treatment doesn’t only smooth my skin, it has also really helped me achieve a more even skin complexion. “ - Sarah, 45
